

IV FASE - 4th PHASE - 4me PHASE

Montaggio dei fianchi e rifilatura.

Side lasting/flange trimming.

Montage des flancs et refilage.

VERDI FOHN

Montafianchi - Rifilatrice IDEAL.

IDEAL side lasting-flange trimming machine.

Machine qui monte les flancs et qui découd.

4th PHASE - SIDE LASTING AND FLANGE TRIMMING

This machine ends the flexible-shoe lasting. It permits the side lasting, the pressing of the lasted shoe edge with the contemporary trimming of the eccedent part (the measure of the edge can be quickly regulated from 6 to 12 millimeters). The working speed can be quickly changed. The temperature of the lasting disk is adjustable. The machine can trim without any kind of problem both the upper and the insole (leather, rubber or other material) up to 15 millimeters thickness.
